"Thanks to its both modern and elegant appearance, products coated with Cosmos Black can be used in a range of applications." Evaluation of the Red Dot July 2019

Hotel Kimpton, AMSTERDAM

Black is the new Black.

Black is in trend and often used, but the Cosmos Black product range by Karcher Design already convinced the juries of three renowned awards. The finish is applied electrostatically as a powder coating. This procedure does not require the use of solvents creating an eco-friendly high-quality product. KARCHER door handles in "Cosmos Black" are scratch-proof as well as highly resistant to corrosion. The particularly matt and soft black surface convinces with its pleasant feel and thus stands for high design quality and outstanding design.

The Cosmos black range has been very well received by our customers, and is becoming ever more popular with architects. Renowned architects like Saguez & Partners, Quadrilatère or Architecture Studio have already been convinced by Cosmos black. High-end offices, like those of Christian Dior Parfum and WeWork in Paris, or the Hotel Kimpton De Witt in Amsterdam show that door handles from Karcher Design can be inserted seamlessly into both designer and high-traffic applications. Our handles represent the perfect blend of modern design and functionality.

category „best product“

category „Layout“

"I believe in good design for all, not only for the selective elite. I believe in design as an interpretation of pleasure." – Itamar Harari, Designer door handle Las Vegas

These words are the main idea behind the work of Harari – design as pleasure. Karcher wants to connect these thoughts to our designer models models Las Vegas and Nevada. Two high-quality handles whose design becomes a pleasure through its perfect shape.

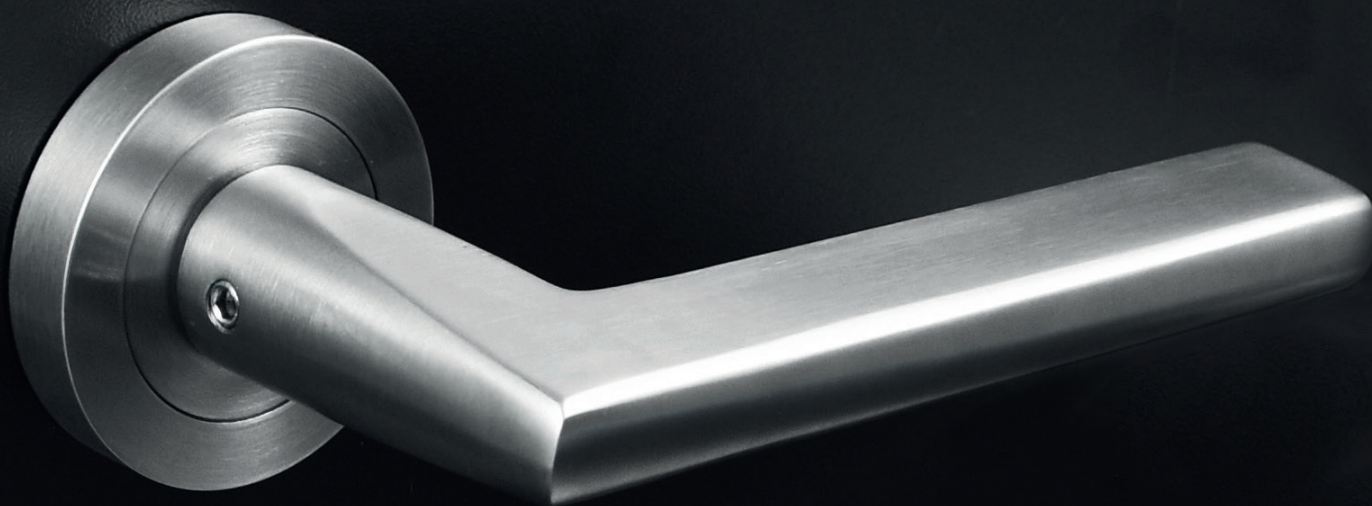

category Special Mention
„Building & Elements“

The German Design Award itself was presented for the first time in 2012 and is one of the most important design competitions worldwide. In the category „Buildings and Elements“, products with special design quality are awarded.

The interplay of shapes and the extraordinary design of the Las Vegas ER87 door handle in combination with the 3-piece rose technology convinced the jury.

category
„interior design“

Karcher Design has created a refined handle with a rounded rectangular shape. The soft edges provide comfort for the user. The reduction to geometric shapes makes the door handle appear elegant and timeless. As with other handle models from Karcher Design, the Montana ER54 can also be paired with our three-part rose technology. Here the customer is offered the highest quality and stability as usual.

The MUUZ Internal Awards of the ArchiDesignClub are presented in cooperation with the magazine Muuz. Every year, the most outstanding new products in the field of architecture are awarded. These include a total of six categories: Construction & Architecture Layout, Coatings & Materials, Interior Design, Lighting, Kitchen & Bathroom and Outdoor.

Available in satin stainless steel or in the Red Dot Award winning colour cosmos black. Thus the door handle adapts perfectly to every ambience.
